Education

University of South Florida (USF) Tampa, FL
Bachelor of Science in Computer Science *Expected Graduation: May 2027*
GPA: 4.00/4.00
Honors and Awards: Dean's List (Fall 2024, Spring 2025, Fall 2025, Spring 2026), USF Presidential Scholarship (August 2024-Present), Microsoft Office Specialist 2016 Master (May 2022-Present)

Skills & Activities

Languages: Java, Python, C/C++, SQL (MySQL/MSSQL/PostgreSQL), JavaScript, HTML/CSS, Arduino, COBOL
Frameworks: React, Framer, Next.js, Express.js, Node.js, Apache Hadoop, Hive, Pig, Spark, Docker, Supabase
Developer Tools: Git/GitHub, VS Code, Visual Studio, AWS, Microsoft Office, Linux, Unix, Command Line Interface
Libraries: pandas, NumPy, matplotlib

Experience

Software Developer Intern | ***React, Next.js, Python, Java, C#*** June 2026 – August 2026
Booz Allen Hamilton *Fort Walton Beach, FL*

- **Selected as 1 of 140 interns nationwide from 10,000+ applicants** for Booz Allen Hamilton's Summer Games; collaborated in a **5-person Agile engineering team** running weekly sprints to build a mission-planning analytics platform for **live, virtual, and constructive (LVC)** training environments
- **Built a full data-processing pipeline** that ingests **DIS PDU mission logs recorded through DIScord**, along with **Environment Generator outputs captured via a custom C# MACE plugin**; transformed these files into structured JSON to enable analysis, visualization, and integration with a local LLM for mission insight generation
- **Developed a frontend** that rendered **graphs, tables, timelines, and geospatial maps**, and integrated a **local Gemma-4 LLM** trained per-file to generate mission insights; managed workflow through **Jira** and collaborated via **GitHub** for version control, reviews, and CI/CD

Leadership

Full-Stack Web Developer October 2025 – Present
Society of Aeronautics and Rocketry (SOAR) at USF *Tampa, FL*

- **Rebuilding the SOAR website using React and Next.js, deployed on Vercel**, while maintaining up-to-date event pages, blog content, and multimedia aligned with **organizational branding**
- **Collaborating with marketing and PR leadership** to deliver a visually consistent, accessible, and **mobile-optimized web experience**, improving navigation and overall usability
- **Developing custom React components and interactive features**, embedding video/photo galleries and dynamic registration forms, and **resolving layout and responsiveness** issues to support high-impact outreach

Director, Outreach + Full-Stack Web → Digital Assets November 2025 – Present
Society of Hispanic Professional Engineers (SHPE) at USF *Tampa, FL*

- **Led ongoing development and performance optimization** of SHPE USF's official Next.js website on Vercel, expanding backend capabilities and launching e-commerce flows for online chapter merchandise purchases; supported **300+ monthly visitors** and drove a **200%+ increase** in site viewership
- **Architected a dynamic photo gallery** by leveraging **Supabase's RESTful APIs** to fetch and render media in real-time, while developing secure admin workflows that utilize **API calls** for seamless **CRUD operations**, media management, and automated publishing directly from the site interface
- **Drove external relations strategy for SHPE USF's spring hackathon** by conducting partner outreach of **40+ professionals/week**, and strengthening long-term industry partnerships to increase funding opportunities

Projects

Full-Stack Weather Application | *HTML, CSS, JavaScript, Express.js, Node.js*

- **Built a full-stack global weather application** that lets users view **current forecasts** for over **200,000 cities**, providing a clear, intuitive experience across devices
- **Developed** it using **JavaScript, HTML, CSS, and a Node.js/Express backend on Vercel**, integrating **OpenWeather's geocoding and daily APIs**, **fuzzy autocomplete search**, **geolocation**, persistent favorites, share-to-clipboard, and a **cron-driven newsletter system** with robust error handling
- **Delivered a fast, reliable, and accessible platform** that offers accurate, timezone-aware forecasts, smooth data flow, personalized user features, and automated daily updates for subscribers
